SYNTHETIC — Asset Memory inspection guide

DRAFT REPAIR GUIDE — reusable acceptance not recorded; safety clearance not granted.

Fictional draft. Requires qualified review.

Job 33333333 · Change 6 · Candidate revision 3

Machine: Synthetic fixture M1 · Example M1 · Serial unknown
Captured UNS address: enterprise.synthetic.fixture
Work order: fixture · Asset unknown · Site unknown
Assignment: Fictional engineering inspection. Preserve the original label, reported observations, unresolved question and later guide correction. No physical work or human acceptance is established.

Private draft. Share workplace data and images only with the data owner’s permission. Synthetic work-order input.

CMMS delivery is not established by this guide.

Source matches, revision claims and images are imported evidence; they do not establish human approval. Execution marks below belong to this saved job.

Proposed packet identity claims

These imported or technician-entered claims do not change the captured identity or address. They do not confirm a different asset or establish CMMS delivery.

Asset memory for this saved record

Historical job snapshot, change 6, draft guide revision 3 · job finish recorded. Captured asset: Synthetic fixture M1. Captured UNS address: enterprise.synthetic.fixture.

Current context read 2026-11-06T06:00:00Z to 2026-11-06T06:00:01Z. Binding: same confirmed asset. This dated overlay is separate from the historical job; it does not establish OEM approval, safety clearance or reusable acceptance.

Historical work and closeout

- Job finish recorded by Synthetic performer at 2026-11-06T02:06:00Z · Inspection recorded; unresolved observation retained..
- Technician QC: selected current-job candidate · user synthetic-performer at 2026-11-06T05:00:00Z. Draft only; reusable acceptance is not recorded.
- Recorded performed: Read the fixture label · Synthetic performer · 2026-11-06T02:02:00Z. Revised candidate instructions do not inherit this completion.
- Not marked performed: Photograph the marked inspection window and record what is visible. · unknown · unknown. Revised candidate instructions do not inherit this completion.
- Not marked performed: Record unresolved observations before preparing technician closeout review. · unknown · unknown. Revised candidate instructions do not inherit this completion.
- Reported Fictional gap observation: 3 demo-unit · Synthetic performer at 2026-11-06T02:04:00Z. Technician report, separate from a source specification. Reported source: technician observation · Synthetic repeat observation
  - 2 demo-unit · superseded report · Synthetic performer at 2026-11-06T02:03:00Z · Reported source: technician observation · Synthetic inspection log
  - 3 demo-unit · current report · Synthetic performer at 2026-11-06T02:04:00Z · Reported source: technician observation · Synthetic repeat observation
- Job question: Cause of the fictional difference remains unresolved. · unresolved · Synthetic performer at 2026-11-06T02:05:00Z

Dated current context

Graph: limited; observations: ready; documents: unavailable; Living Sheet create request: ready.

- has component: Fictional inspection indicator (unknown) · graph updated unknown. Dated graph address: enterprise.synthetic.moved.fixture. Principal graph reference; edge review/version and installed component instance linkage are unknown.
- Reported seal leak: **CONTESTED technician reports**. Latest report: absent · reported by Fictional reporter B · observed 2026-11-06T01:02:00Z · recorded 2026-11-06T01:03:00Z · uncertainty fictional report · self-reported verification method: self_reported.
  - Conflicting report: absent · Fictional reporter B · observed 2026-11-06T01:02:00Z · recorded 2026-11-06T01:03:00Z · uncertainty fictional report · self-reported verification method: self_reported
  - Conflicting report: present · Fictional reporter A · observed 2026-11-06T01:00:00Z · recorded 2026-11-06T01:01:00Z · uncertainty fictional report · self-reported verification method: self_reported
- Living Sheet work-order create request: verified_by_readback · requested unknown · updated 2026-11-06T05:30:00Z · external reference fixture-order-77. This reader does not establish other work orders, provider asset linkage, UNS delivery, repair or work-order completion.

Bounded summary: 31 of 31 reader facts included; 0 omitted, 0 strings shortened, 0 nested details omitted. Graph producer limits and upstream omissions may be unknown. Complete historical evidence remains in the saved record.
